

ACCSP Coordinating Council

ASMFC Annual Meeting
Beaufort, NC

8:30 – 10:30 am | October 17, 2023

Chair: Jason McNamee
Vice-Chair: Kathy Knowlton
Staff: Geoff White

Our vision is to be the principal source of fisheries-dependent information on the Atlantic coast through the cooperation of all program partners.

Council Consent

- a) Approval of Agenda
- b) Approval of Previous Meeting Minutes

Our vision is to be the principal source of fisheries-dependent information on the Atlantic coast through the cooperation of all program partners.

Consider FY2024 ACCSP Project and Administrative Proposals for Funding

*Our vision is to be the principal source of fisheries-dependent information
on the Atlantic coast through the cooperation of all program partners.*

FY2024 Funding Options

Recommendations from Operations and Advisors

- The Operations and Advisory Committees recommend following the combined rankings with the caveats as noted below.
 - Administrative grant: Fully fund the base budget inclusive of Option 2 (\$50K). The committees felt Option 1 was important and be offered again next year if alternative funds are not found.
 - Maintenance projects recommendation: Use a portion of the \$250K carry-over to fully fund the top six (6) maintenance proposals and to not fund the seventh project (RI whelk) as that species is not in the top quartile of the biological matrix.

Recommendations from Operations and Advisors

- New projects recommendation: Use the new project bank and the remaining portion of the \$250K carry-over to fund the top three (3) new proposals:
 - Development and Integration of National Marine Fisheries Service (NMFS) Highly Migratory Species (HMS) Data Elements into VESL
 - Development of Statistical Frames for Dockside Biosampling of the Recreational Headboat and Commercial Fishing Fleets in the South Atlantic
 - Massachusetts Oracle Forms Redesign and Modernization: Phase 2
- The two (2) projects below are seen as valued and the committees recommend that they both be considered for funding. The tilefish project had the next highest ranking and economic project was ranked as highly as possible given the range of the program priorities.
 - Improving Catch and Effort Data Collection from Recreational Tilefish Anglers
 - The Economic Impact of Rhode Island's Fishing Industry

Recommendations from Operations and Advisors

- The committees recommend that early funding (November) be used for Option 2 of the Administrative Grant (\$50,000) and for the new SC DNR project to add HMS fields to VESL (\$112,900) as both projects are able to start work on that timeline and would not require moving funds.
- The committees request that the funding subcommittee be convened to review and potentially update the available point ranges of program priorities in the ranking process with consideration of the increased importance of socio-economic data in recent years.

FY2024 Proposal Funding Action:

Address proposals for action as four motions

1. Consider Administrative proposal with Option 2
2. Consider Maintenance proposals
3. Consider New proposals
4. Consider proposals for early start date

SciFish Policy

Our vision is to be the principal source of fisheries-dependent information on the Atlantic coast through the cooperation of all program partners.

SciFish Action:

Consider policies and applications for action.

Motion:

Program Updates

Our vision is to be the principal source of fisheries-dependent information on the Atlantic coast through the cooperation of all program partners.

ACCSP Fully Staffed

Skye Thomas joined the data team on July 17. Skye is a Virginia native, and has recently completed her MS degree at UNC Wilmington. Her experience in shellfish, aquaculture, and GIS will be valuable additions to the team.

Software

Our vision is to be the principal source of fisheries-dependent information on the Atlantic coast through the cooperation of all program partners.

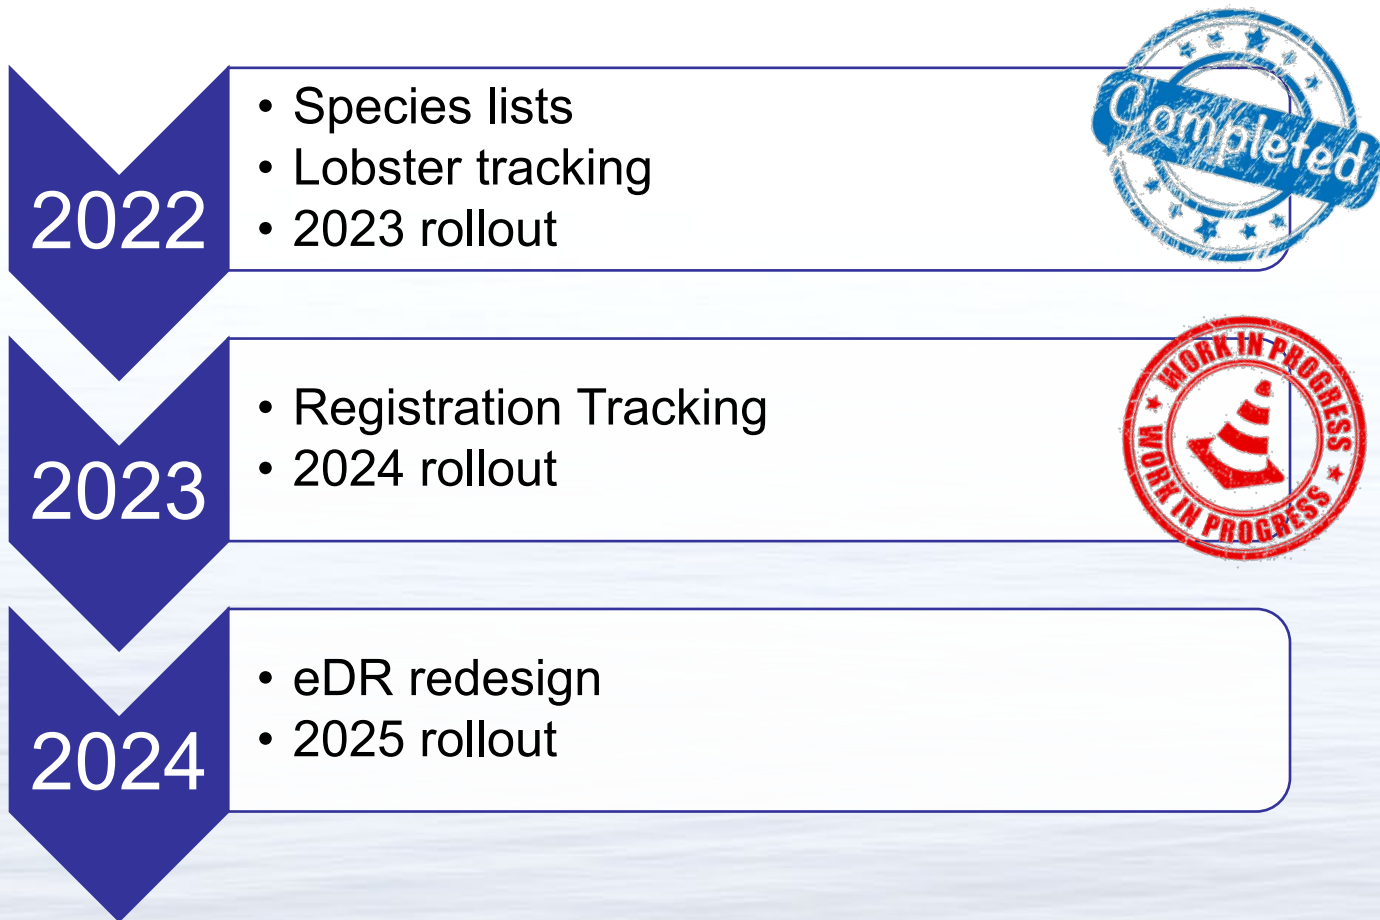

Validation Implementation

- Contractor hired

VALIDATION IMPLEMENTATION PROJECT TIMELINE

Software Long-term Project Plan

Future Planning

- Future projects and prioritization will be discussed at the Spring 2024 Information Systems meeting
- Potential projects
 - Registration tracking implementation (eTRIPS)
 - Expansion of One Stop Reporting
 - Other

Our vision is to be the principal source of fisheries-dependent information on the Atlantic coast through the cooperation of all program partners.

Biological and Bycatch Metadata Inventories

*Our vision is to be the principal source of fisheries-dependent information
on the Atlantic coast through the cooperation of all program partners.*

Biological & Bycatch Metadata Inventories

Spring 2023:

Inventories
deployed after
committee
meetings

Today:

Inventories live in
the Data
Warehouse

September 2023:

Partners have
populated 78
programs / 56
species

Biological & Bycatch Metadata Inventories

- Committee members enter metadata about biological sampling and bycatch monitoring programs
- Centralized catalog of programs along the Atlantic coast
- Sampling methodology and primary contact information
- Any public and login Data Warehouse user can download information.
 - Committee members
 - Stock assessment scientists
 - What state or federal programs, if any, capture fishery-dependent biological sampling or bycatch information about species X?

Biological & Bycatch Metadata Inventories

Our vision is to be the principal source of fisheries-dependent information on the Atlantic coast through the cooperation of all program partners.

Accountability Workshop

- Recommendation from 2022 Accountability Report:
Best Practices Workshop
 - *compare data collection programs, audits, and trips versus dealer reports*
 - *share methods and ideas in order to de-silo our independent efforts at improving data quality and accountability*
- Workshop (ACCSP funds)
 - February 12-16, 2024
 - Charleston, SC

Accountability Workshop: Goals

Advisors Elections

Congratulations:

Dee Lupton (NC) – Chair

Fran Karp (RI) – Vice-Chair

Thank you, Ellen Goethel
for your commitment and
energy!

SciFish Policies & Procedures

ACCSP Coordinating Council
October 2023

Thanks to the SciFish Organizing Committee for all of their hard work and dedication to this project!

- SAFMC: Julia Byrd, Meg Withers, Chip Collier, Nick Smillie, Allie Iberle
- NCDMF: Brandi Salmon, Jeff Moore, Ami Staples, Andrew Valmassoi, Steph McInerny, Drew Cathey
- ACCSP: Julie Simpson, Jamal Oudiden
- GADNR: Kathy Knowlton
- RIDMF: Mike Bucko
- NOAA: Lauren Dolinger-Few
- Harbor Light: Fran Karp & Bill Spain

CITIZEN SCIENCE POWERED BY ACCSP

SciFish - Introduction

Citizen science is a potentially powerful tool to better understand marine fish populations

Growing interest in using citizen science to supplement marine fisheries data collection

Development of SciFish, citizen science mobile application and project builder, to support capture and sharing of information about fish along the Atlantic coast

SciFish Long Term Goal

Develop for ACCSP partners:

- ✓ **citizen science mobile application** and
- ✓ **menu-driven project builder interface** to
- ✓ **easily create a customizable application** by selecting specific data fields
- ✓ **without need to develop stand-alone applications** for each new project or data need

SciFish Development Drivers

Reduce costs needed
to develop individual
applications

Reduce time to
create applications
from ground up

Increase consistency in
data fields and
structure

SciFish Vision

To create a citizen science mobile application that encourages and supports the capture and sharing of data on Atlantic coast fisheries.

SciFish Mission

- Standardize collection of citizen science data from Atlantic coast fisheries
- Provide a single platform for multiple data collection projects
- Provide a flexible project builder and create new data collection projects with minimal resources
- Provide access to data that supports fisheries stock assessment and management

Additions since August

SAP will bring in consulting expertise as needed

Language on account creation

SciFish Administration & Oversight

Administration through
ACCSP

Primary oversight by: SciFish
Advisory Panel (SAP)

SciFish Advisory Panel

Draft and recommend SciFish
policy updates

Oversee and implement SciFish
application process

Coordinate and review
SciFish project updates

SciFish Project Development

Approach

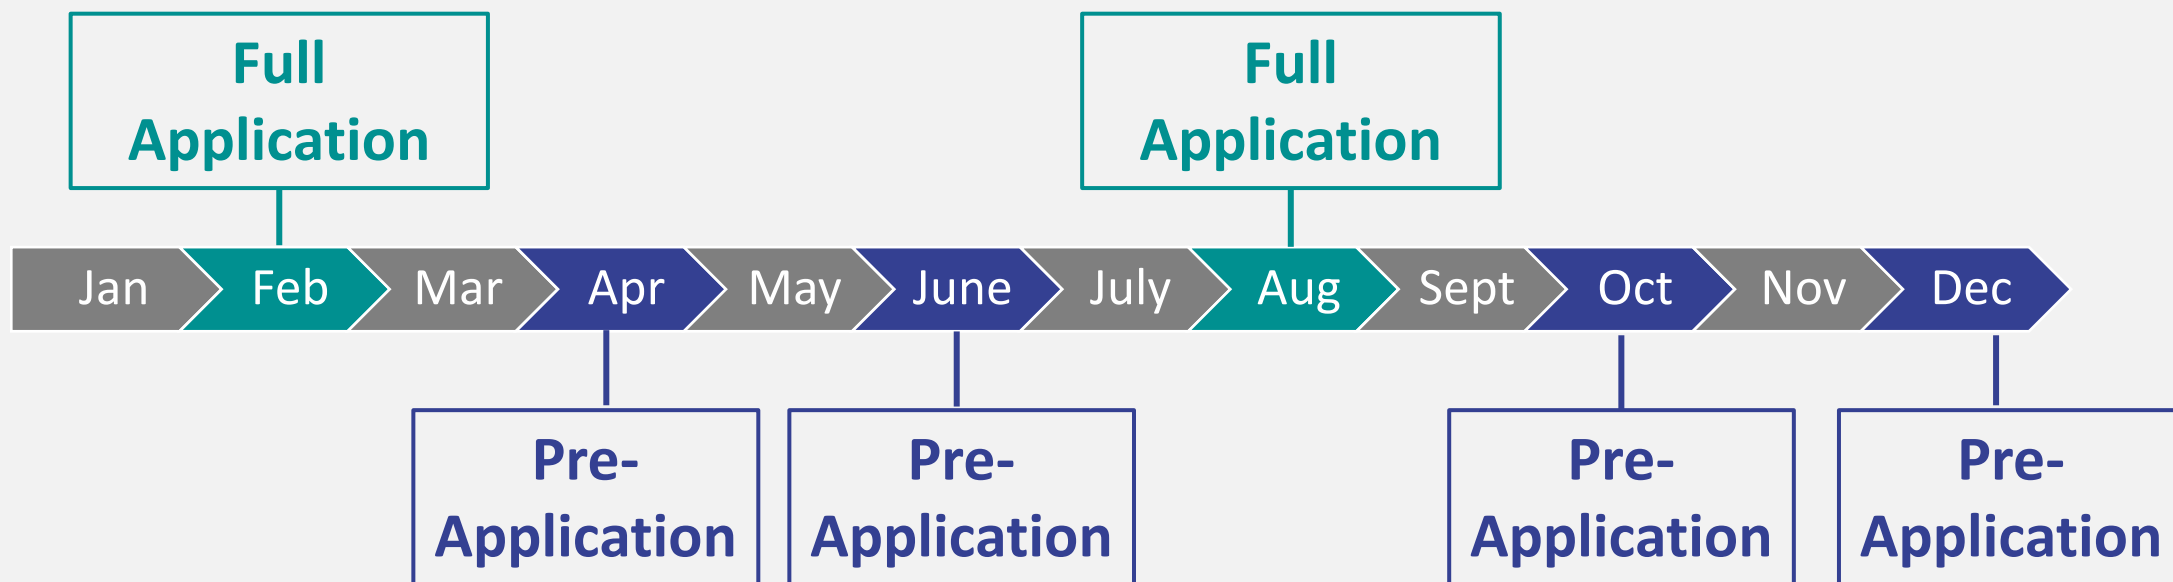

- Focus on data collection for marine and/or diadromous fisheries along the Atlantic coast
- Fill data gaps or data deficiencies and address identified research needs
- Use intentional design and clearly articulate how collected data will be used in management and/or stock assessments
- Encourage scientist and fishermen collaboration

SciFish Project Development

*Multi-step Application Process**

*Projects must have ACCSP partner as PI or be sponsored by an ACCSP partner

SciFish: Account Creation

Option 1: currently in place

- PI's create SciFish project accounts for users
- SAFIS Account – SciFish access

Option 2

- Users create SciFish project accounts
- 'Auto-approval' Non-SAFIS account – SciFish access

Option 3

- Combination: PI chooses option 1 or 2
- Requires more ACCSP resources to create
